

INDIAN CREEK HIGH SCHOOL

September 22, 2009

Dear Parent(s)/Legal Guardian(s),

We are excited to announce that we have launched a new portion of our student management system that allows the families of Indian Creek High School and Indian Creek Middle School to view their students' academic progress online! The web-based program is called HomeLogic, and it allows you to view your child's assignments, grades, attendance, and general announcements from teachers.

At Indian Creek School District, we believe that parent involvement is critical to the advancement of a student's education. HomeLogic will provide one more way to increase communication for teachers and families. Grades to date are entered every Monday. However, depending on the time frame for completing assignments, and adequate time for grading, there will be some assignments that are posted, but no grade available at that time.

We would like to invite you to sign up for this access for your student(s). If you have a child in both the middle school and high school then you will have one login for access to each school's HomeLogic website. To sign up for an account, please send an email to ichomelogic@kidsroe.org. Include your name, your students name(s) and which building they are in. Your login information, parent help sheet, and web links to the sites will be emailed to you. Requests will be set up within one week of receipt.

Sincerely,

Sarah Montgomery, ICHS Principal
Paula Kennedy, ICMS Principal
Becky Boldt, District Technology Coordinator
